# ePost communication platform
The platform for secure and channel-independent communication

The ePost communication platform enables companies to reach their customers and employees reliably and securely via any written communication channel, including ePost, eBill, SMS, e-mail or physical private letter box: in a recipient-oriented, automated and cost-optimized way.

Efficient omnichannel communication

Simple

The ePost communication platform is the innovative communication solution for sending, receiving and archiving written information of all kinds efficiently and easily. You can also interact digitally with your recipients.

Secure

The ePost communication platform guarantees the proven principle of mail secrecy in the digital world and enables channel-independent, secure exchange of information via a trustworthy Swiss provider.
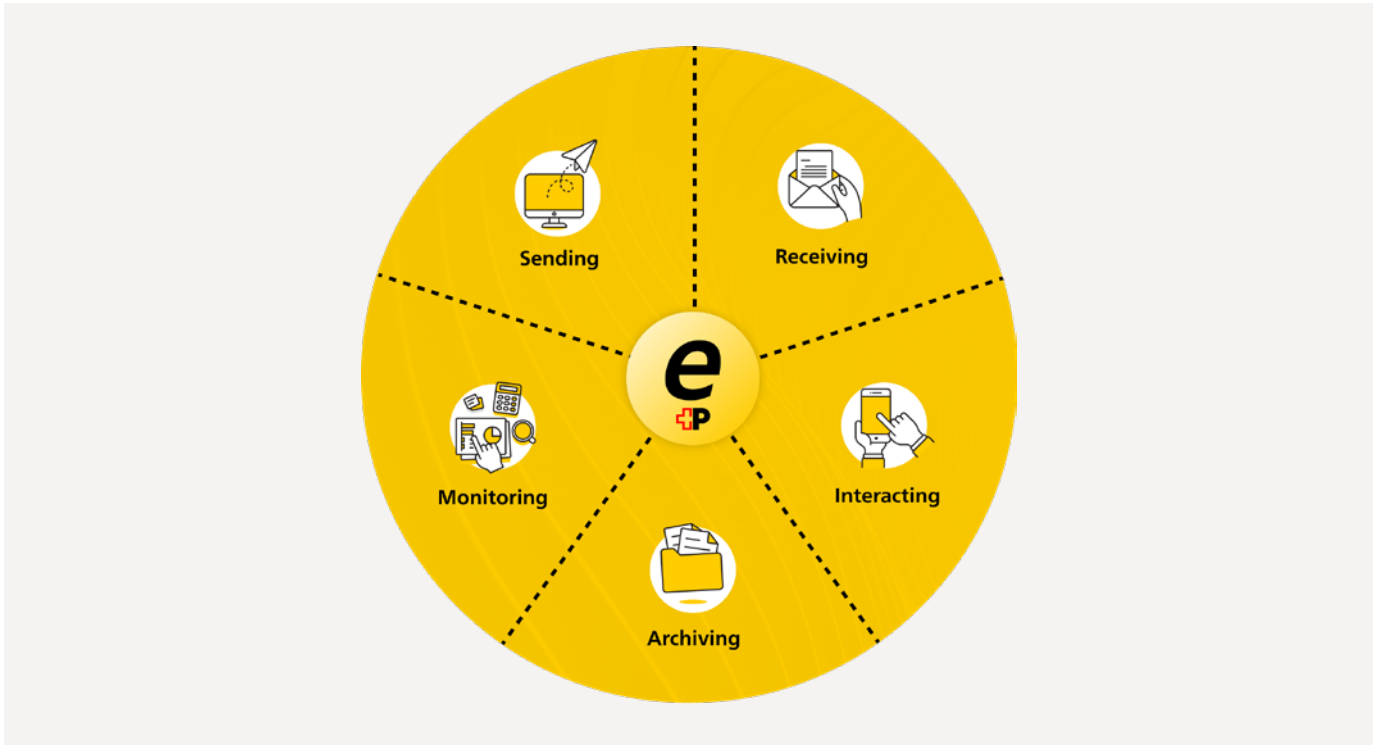

Digital

The ePost communication platform increases speed, streamlines conventional communication processes and reduces CO_2 emissions. In addition to offering excellent input and output processes, the platform also guarantees traceability thanks to monitoring of all sending processes and channels.

The benefits for you

– Automated delivery via your recipients' preferred channel
– Optimized costs
– Guaranteed data security
– Digitization of communication processes without the need for major IT projects

– Monitoring of sending processes and channels
– Promotes sustainability: reduction of paper and CO_2 emissions through digital delivery

The ePost communication platform enables you to receive mail items digitally and to send, archive and track all kinds of communication. You can also interact digitally with your recipients and digitize communication processes end-to-end without any media disruptions.

everything digitally wherever possible and transfers other items to your print partner to be sent physically. This enables you to achieve high digital penetration for your communication processes and ensures verifiable sending processes and channels.

Smart office for your daily post
Digitize all your communication with the ePost communication platform: both the mail you receive and the mail you send. With the ePost scanning service, you can also receive your physical mail in your digital letter box, store your correspondence in the ePost e-archive in compliance with AccO, and send invoices and letters from any workplace using ePost SmartSend via online access or printer driver.

Smart API for software manufacturers
Would you like to offer your customers an omnichannel communication solution for sending invoices and letters via a trustworthy, secure Swiss provider? Integrate the ePost oneAPI interface into your solution (ERP, specialist system, billing, etc.) easily and conveniently. This will allow you not just to send mail, but also to receive incoming letters for key standard processes digitally.

Smart business communication – for your bulk mailing
Do you send a high number of invoices or letters on a regular basis, and usually in physical form? The ePost communication platform enables you to reach all recipients via their preferred channel on an automated basis and at optimized costs. Send your correspondence digitally via the ePost communication platform or have your print output digitized conveniently by the ePost Hub. The ePost communication channel sends
