

Dialog G6

The integrated complete solution for public administrations

Dialog G6 is a software solution that provides cities and municipalities with the best possible support in the ongoing digitization process. The browser-based web application is an innovation in Swiss e-government. The business processes merge seamlessly in this complete solution. Regardless of where you work, Dialog G6 enables you to access all data and content electronically at all times.

Increase the efficiency and quality of your business processes

Dialog G6 makes integrated business processes a reality. The complete solution has clear advantages compared to a complex construct of individual systems and interfaces. The information flow is continuous and without media disruption. Users of the overall system are conveniently guided through the specialist applications in their business process. Cross-divisional appli-

cations such as Dialog G6 Documents make information directly available in all relevant subject modules. The simple and intuitive user interface allows municipalities to work even more efficiently.

The advantages for you with Dialog G6

- Seamless digital interaction options between authorities, offices and residents. All public administrations' processes are covered in this complete solution.
- The only browser-based solution on the Swiss e-government market.
- The browser-based solution functions without installation on work devices such as PCs, tablets or smartphones and enables access regardless of location.
- Easy to use and identical in application and user guidance in different work areas.
- Important correlations, key figures and graphic visualizations are available at a glance. Automatic processing in the background relieves the burden of routine work.
- Popular, proven and used hundreds of times – developed in Switzerland and for Switzerland – for over 40 years.

This is what lies behind Dialog G6

- Browser-based integrated complete solution with maximum device and location independence.
- The basic architecture creates flexibility for adaptations: new technologies can be implemented in the frontend and backend within a very short time.

“ Dialog G6's new, fresh and intuitive user interface is very much appreciated by the staff at administrations – it makes work a real pleasure. ”

Christian Hartmann, Communal Chancellor, Wilderswil (BE)
