Optimize your case management with Diartis Solutions AG

Integrated software solutions for efficient case processing, social participation and work integration

In occupational health management, work integration or integration assistance, you are faced with the challenge of managing complex processes efficiently while maintaining an overview. The solutions from Diartis Solutions AG – CASEnet, TEILHABEnet and work integration ARInet – offer you a comprehensive and modular system for effective case management. This allows you to simplify your processes, improve collaboration and achieve better results in the long term.

What is case management?

Case management is a structured procedure aimed at efficiently managing and coordinating individual cases. The aim is to ensure optimum care and support for clients through targeted interventions and close cooperation between all stakeholders. The solutions from Diartis – CASEnet, TEILHABEnet and ARInet – provide you with a powerful tool that supports you in case management, documentation and coordination in various social and professional contexts.

Key advantages

With the solutions from Diartis Solutions, you enjoy a wide range of advantages that take your case management to a new level:

– **Increased efficiency**
  Automated workflows and seamless integration into existing systems reduce manual tasks and enable faster processing.
– **Transparency**
  All the relevant information is available centrally, which makes collaboration and decision-making much easier.
– **Flexibility**
  Modular expansion options enable custom changes to the specific requirements of your organization.
– **Data security**
  State-of-the-art encryption and access mechanisms protect your sensitive data at all times.
– **Scalability**
  Our solutions grow with your company – ideal for small to large organizations.
– **Data security and compliance**
  Your data is safe with us. The software solutions meet all relevant data protection guidelines and provide maximum security for sensitive information.

The solutions

Our software solutions have a modular structure and give you the option of using exactly the functions that you need:

CASEnet
The comprehensive solution for classic case management. Ideal for supporting clients in a wide range of sectors, from social services to healthcare organizations.

TEILHABEnet
Specifically developed for social participation, this software supports the coordination and management of measures for integration and participation in society.

ARInet
This product focuses on professional integration and helps you to provide clients with the best possible support as they return to the labour market.

With these solutions, each organization can design its case management individually and meet its specific requirements. You benefit from a tool that makes your work easier while also promoting the success of your clients.

Here's how it works

The implementation of CASEnet, TEILHABEnet and ARInet is straightforward and can be integrated seamlessly into your existing IT landscape. The use of modern cloud technologies guarantees high availability and accessibility, regardless of location or end device.

– **User-friendly interface:** Intuitive user interfaces ensure quick familiarization and simple operation.
– **Automated processes:** From case recording to documentation – automated processes ensure consistency and save time.
– **Interactive dashboards:** Real-time analyses and reports enable continuous monitoring and optimization of your case management processes.
